

Nature Reserve Visit Year 4

On Thursday the 6th of October, Year 4 went to the Milton Lock Nature Reserve. We talked to some of the children and a teacher who went to the reserve. This is what we found out about the nature reserve.

Rosie Warner in 4LF stated: “We went to the beach and looked for sea creatures like: crabs-they had sharp claws; daddy long legs- they were funny; and sandworms-they were slimy!”

Next we interviewd Isabella Osborn (4LF). She said: “There were slowworms, seaweed, crabs, fire ants, spiders and sandworms. It was really fun!”

Two other girls, called Ellie and Rose, agreed that: “It was fun: we saw yellow spiders, red spiders and lots and lots of red ants.”

Finally, I asked Mr Sands (the teacher of 4IS) what it was like: “The children had lots of fun and it was a great opportunity for the kids. They loved the field part and the beach part” He was then asked: who were the people that the kids met? “They met people like the animal keeper and the manager and staff and the tour guide.”

Clearly, the children had a great time.
