

NCETM Mastering Number Overview

(ELG in bold)

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer Terms
<u>Subitising</u> (being able to see how many in a set without counting)	<ul style="list-style-type: none"> Subitise within 3 Identify sub-groups into larger arrangements Create own patterns for numbers within 4 Use of fingers to represent quantities Experience subitizing in range of contexts 	<ul style="list-style-type: none"> Subitise within 5 	<ul style="list-style-type: none"> Subitise by exploring patterns within 5 in random and structured arrangements 	<ul style="list-style-type: none"> Explore symmetrical patterns, including familiar patterns, to make link to doubles 	<ul style="list-style-type: none"> Practice subitising arrangements including '1 more' and 'double' patterns Subitise to identify when patterns show the same number in a different way Subitise to identify when patterns are similar, but have a different number Subitise structured and unstructured patterns within 10 Identify when it is right to count or subitise
<u>Cardinality</u> (parts of a set) <u>Ordinality</u> (number relationships and order) <u>Counting</u>	<ul style="list-style-type: none"> Relate counting to seeing that the last number spoken is the set Develop knowledge of counting sequence through rhyme and song Develop 1:1 counting correspondence Develop understanding that anything can be counted Explore strategies to support accurate counting 	<ul style="list-style-type: none"> Link the cardinality of 5 to dice and fingers on 1 hand Begin to count beyond 5 Recognise numerals and relate to quantities 	<ul style="list-style-type: none"> Develop verbal counting to 20 and beyond Develop object counting skills to develop accuracy Link counting to parts of a set using fingers to represent numbers to 10 Order numbers linking cardinal and ordinal representations of number 	<ul style="list-style-type: none"> Consolidate own understanding of parts of a set with numbers over 10 Become familiar with the counting pattern beyond 20 	<ul style="list-style-type: none"> Verbally count to 20 and beyond, from different starting numbers Develop confidence and accuracy in verbal and object counting
<u>Composition</u> (knowing numbers are made of smaller numbers)	<ul style="list-style-type: none"> Understand that numbers are made of ones Compose own sets within 4 	<ul style="list-style-type: none"> Learn concept of 'whole' and 'part' with different objects composed of parts Understand 'whole' and 'part' using objects that cannot be taken apart Compose numbers within 5 	<ul style="list-style-type: none"> Composition of 5 recalling 'hidden' parts for 5 Composition of 6 linked to familiar patterns (dice) including symmetrical Number within 10 can be composed of '5 and a bit' 	<ul style="list-style-type: none"> Composition of odd and even numbers, looking at the 'shape' Link even numbers to doubles Explore the composition of numbers within 10 	
<u>Comparison</u> (Knowing which numbers are worth more or less)	<ul style="list-style-type: none"> Understand sets can be compared according to different attributes Use language of comparison Compare sets just by looking 	<ul style="list-style-type: none"> Compare sets in different ways e.g. 'just looking', subitizing or matching Compare sets by matching to one in the other set which contain same or equal amounts 	<ul style="list-style-type: none"> Compare sets using the language of comparison Play games involving comparing sets Compare by matching and identifying when sets are equal Explore ways to make unequal sets equal 	<ul style="list-style-type: none"> Compare numbers, reasoning which is more Compare using both an understanding of the 'howmanyness' of a number and its position within the number system 	<ul style="list-style-type: none"> Order sets of objects linking to their understanding of the ordinal number system

Other Mathematical Learning Overview

(NCETM scheme followed to match with Mastering Number)

	Autumn Terms	Spring Terms	Summer Terms
Pattern Sequencing	<ul style="list-style-type: none"> • Detect and use patterning intuitively • Recognise sequenced pattern 	<ul style="list-style-type: none"> • Recognise, describe and build repeating ABAB patterns • Create own specific patterns 	<ul style="list-style-type: none"> • Translate patterns into new media or using new materials
2D Shapes	<ul style="list-style-type: none"> • Match shapes that are familiar when in same orientation and size • Make a picture by placing shapes in outlines areas • Represent some specific shapes eg: circle • Match shapes in different sizes and orientation 	<ul style="list-style-type: none"> • Compare and match a wider range of shapes with the same size and orientation • Compare and match a wider range of shapes with different sizes and orientations • Compares and matches combinations of shapes together • Combine shapes to make parts of the picture. • Trace the outer frame of a picture that contains other shapes. 	<ul style="list-style-type: none"> • Name 2D shapes: circles, squares and triangles • Construct shapes from parts • Recognise more rectangle sizes, shapes and orientations • Decompose a shape into smaller known shape • Rotate and reflect shapes to fit into a puzzle to create a shape or picture. • Name and locate a shape within a shape.
3D Shapes	<ul style="list-style-type: none"> • Recognise a sphere or cube from a set of 3D shapes • Sort and stack similar blocks • Create a “house” using blocks in a horizontal pattern 	<ul style="list-style-type: none"> • Name some 3D shapes • Build arches/bridges, enclosures, corners, and crosses, using trial and error and simple addition of pieces 	<ul style="list-style-type: none"> • Identify and count the faces on a cube or prism • Build arches/bridges, enclosures, corners, and crosses with prediction and understanding • Build by making specific multiple internal spaces
Small Step Spatial Visualisation	<ul style="list-style-type: none"> • Move shapes to a location by physical trial and error • Move shapes to achieve an outcome 	<ul style="list-style-type: none"> • Rotate shape or object through turns and reflect in horizontal or vertical line to match another shape 	<ul style="list-style-type: none"> • Know that shapes can be turned or flipped to fit into place e.g. puzzle piece • To know how a shape can be moved to fit into place before moving it •
Measures	<ul style="list-style-type: none"> • Recognise length, weight and height • Sort objects into long and short. thin and thick, wide and narrow, big and small, heavy and light, full and empty • find something that is longer/shorter or heavier/lighter than a given reference item 	<ul style="list-style-type: none"> • can use one thing to compare with two others, • compare units of different sizes in practical contexts. • use units to ‘measure’ and compare 	<ul style="list-style-type: none"> • use positional language of time I can state the order of the days of the week • sequence se events in terms of length eg: Playtime and the school day.
